

PRITAM SINGH

AUTOMATION TEST ENGINEER

Mobile: 7903477029

Email: pritamsingh61753@gmail.com

Location: Bangalore, India

PROFESSIONAL SUMMARY

7.5+ years of experience in Information Technology, with specializing in Software Quality Assurance Testing or SDET, proficient in testing on Banking and Finance or BFSI, Insurance and Health Care domain as Automation and Manual Testing. Experience in analyzing functional requirements and translate them into Test cases. Well acquainted with Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).

SKILLS

- **Testing Tools:** Selenium, Playwright, Cucumber, TestNG, Postman, Swagger, RestAssured, JIRA, Rally
 - **Languages:** Core Java, OOPs, JavaScript, TypeScript
 - **Frameworks:** POM, BDD, Hybrid, Data-Driven
 - **CI/CD Tools:** Jenkins, Git, GitHub, Maven, Gradle
 - **Testing Types:** Functional, Regression, Integration, API, Sanity, Manual
 - **Additional Tool :** IntelliJ, VS Code, Splunk, AWS, DynamoDB, Rest API, SQL, Mongo DB, Gen AI tools
-

PROFESSIONAL EXPERIENCE

Wissen Technology Pvt. Ltd.

April 2025 – Present

Senior Software Engineer

Bengaluru, India

Projects: PELM (Post Execution Lifecycle Management), **Client:** Morgan Stanley, **Domain:** BFSI

Project Overview:

PELM Event Enrichment is an enterprise-grade investment banking platform responsible for processing structured product lifecycle events and generating accurate settlement instructions across multiple Asian markets. The system integrates upstream trade booking, product reference data, and market data feeds to enrich events with financial calculations such as FX rates, residual cash, share quantities, and regulatory charges. The platform plays a critical role in ensuring accurate, timely, and compliant settlements for global financial institutions.

Achievements/Tasks:

- Architected and implemented a scalable BDD automation framework using Cucumber.js, JavaScript (ES6+), Node.js, and Gherkin for structured-product settlement workflows.
- Automated end-to-end trade lifecycle validation across Helios, PDS, DataLink, and PELM systems ensuring accurate event enrichment and settlement processing.
- Validated complex financial calculations including multi-currency settlements, FX conversions, residual cash, share quantities, and stamp duty across 14+ Asian markets.
- Developed UI automation using Playwright and Selenium with JavaScript validating settlement dashboards, event visibility, and reconciliation screens.
- Automated REST API testing for Spring Boot microservices using Axios, Chai, and JSON schema validation.
- Performed database validation on MongoDB replica sets with GSSAPI/Kerberos authentication ensuring zero data discrepancies. And also used different-different AI tools like github copilot, Cursor AI etc.
- Integrated automation suites with Jenkins CI/CD pipelines reducing execution time by 70% and achieving zero production defect leakage.

Copperpod Digital

September 2024 – March 2025

Automation Test Engineer

Bengaluru, India

Projects: BrandAstra, **Client:** Bewakoof.com

Achievements/Tasks:

- Executed automation test cases (250-300) for topics and chatters across platforms like Twitter (X), Facebook, Instagram and Flipkart, ensuring robust coverage of 23-25 features.
- Leveraged Selenium with Java, TestNG, and POM to create hybrid, BDD (Cucumber), and data-driven frameworks for functional, API, regression, integration, and end-to-end testing.
- Automated testing pipelines integrated seamlessly with Jenkins, Git, and GitHub to ensure continuous testing and automated REST API testing for Spring Boot microservices.

Right Avenue Infotect Pvt. Ltd.

April 2023 – April 2024

Automation Test Engineer

Bengaluru, India

Projects: PaymentHub(Playstation Direct), **Client:** SONY, **Domain:** Banking and Finance

Achievements/Tasks:

- Implementation of BDD test automation framework or Cucumber framework using Rest API with Postman and core Java. And automated REST API testing for Spring Boot microservices.
- Created 2000+ Automation test cases including 7 features files with multiple Scenarios, for Adyen, Bibit, Paypal etc APM's.
- Analysis all the test cases through Core Jenkins after build execution in daily basis.

FIS Global Pvt. Ltd.

September 2020 - July 2022

Sr Software Engineer

Bengaluru, India

Projects: APM's (Alternative Payment Methods) for Merchant Solutions, **Client:** Worldpay , **Domain:** Banking and Finance

Achievements/Tasks:

- Involved Test design for automation framework of ideal APM(European Alternative Payment Method). And Maintained 280+ Automation Test cases.
- Involved designing and implementation of BDD test automation framework or Cucumber framework using Rest API with Postman and core Java. And involved all agile ceremonies.

Snovaspace Information Systems Pvt Ltd.

September 2016 - July 2020

Software Test Engineer

Hyderabad, India

Projects: Aetna client, **Domain:** HealthCare and Insurance

Achievements/Tasks:

- Testing the Excel sheet and invoices which was containing persons whose age post 65(post-retiree) and pre 65(pre-retiree).
- We used to involve Functional Testing as well Smoke Testing and Sanity Testing.
